A. NONE

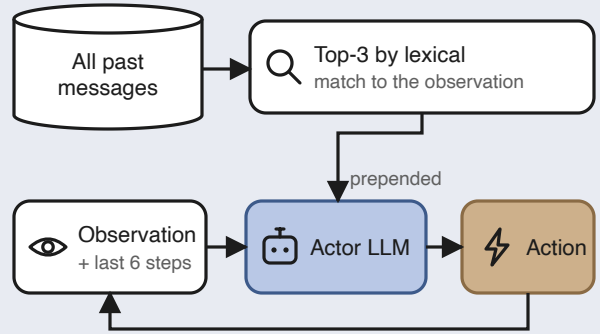

the briefing leaves the window after 6 steps

B. BANK (re-injected briefing)

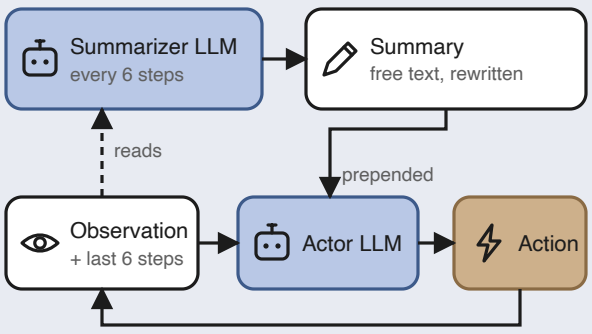

never updated; the cancel message is only in the history

C. RETR (lexical retrieval)

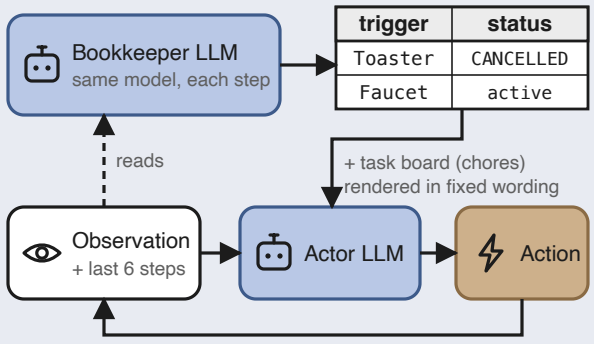

the cancel message is stored, but rarely retrieved

D. SUMM (rolling summary)

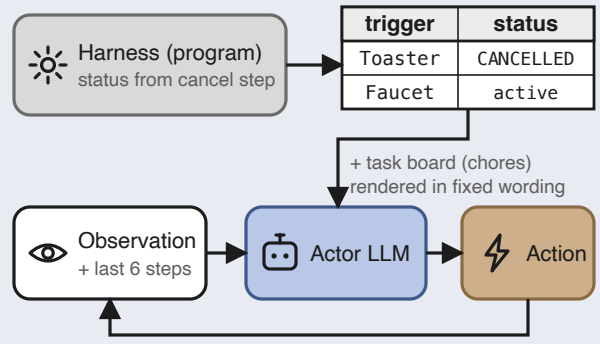

the summary usually says "(cancelled)" and keeps the imperative

E. RWIM-LEDGER (self-kept ledger)

reads the messages itself; no access to the true cancel step

F. SCHED (status-tracked, reference)

same ledger as E, written from ground truth
